(54) Title: CONTENT DISTRIBUTION SYSTEM, LICENSE DISTRIBUTION METHOD AND TERMINAL DEVICE

(57) Abstract: The transmission format A license conversion unit (430) of the terminal device (120) converts the transmission format license (710), which is obtained from the license relay server (110), described in a transmission format into a processing format license (510) to be specified by the conversion format specification information (711) and detects modifications on the license whose format has already been converted by performing a signature verification on the after-conversion processing format license (510) using a processing format signature (712).
